

NOTE:

The Contractor is to check and verify all building and site dimensions, levels and sewer levels from levels at construction points, before work starts. This drawing must be read with and checked against any structural or other specialist drawings provided.

The Contractor is to comply in all respects with the current Building Regulations whether or not specifically stated on these drawings.

This drawing is not intended to show details of foundation or ground conditions. Each area of ground relied upon to support the structure of foundation is provided by the contractor and suitable methods of foundation to be provided.
