

NOTE:  
 The Contractor is to check and verify all building and fire dimensions, levels and scope prior to the construction phase, before work starts. This drawing must be read with and checked against any structural or other specialist drawings produced.  
 The Contractor is to comply in all respects with the current Building Regulations whether or not specifically stated on these drawings.  
 This drawing is not intended to show details of foundation or ground conditions. Each area of ground relied upon to support the structure of foundation to be provided by the Contractor and suitable methods of foundation to be provided.
